Sir:

**INTERVIEW SUMMARY**

This paper is filed in response to the Interview Summary prepared by the Examiner on March 25, 2005.

Claims 24, 26, 27, 40-45, 48, 49, 51-53, 59, 63, 65, and 68-70 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al. (*J Exp Med* 188:1623-1631 (1997)) in view of a number of other references recited in the Office Action.

Applicant's representative wishes to thank the Examiner for the opportunity to discuss priority document EP 97101019.4 in a telephone interview conducted on March 25, 2005. More specifically, Applicant, in response to the Office Action mailed January 31, 2005, furnished the Examiner with a copy of the English language priority document EP 97101019.4, filed January 23, 1997. During the interview it was agreed that the priority document EP 97101019.4

discloses all the claimed sequences and the combination of the sequences and an antigen, as claimed, and predates the Chu et al. reference upon which the sole outstanding rejection, made under 35 U.S.C. 103, is based in part. Accordingly, agreement was reached with respect to reliance upon the priority document to overcome the sole outstanding rejection.

Applicant respectfully points out that the Interview Summary prepared by the Examiner erroneously refers to "the 102 rejection of record", rather than to the 103 rejection of record.

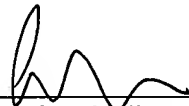

The Examiner inquired during the course of the interview if there is a length limitation of the polynucleotide sequences. Applicant's representative pointed out a location in the priority document of support for lengths ranging from 5-100 nucleotides.

The Examiner indicated she would promptly perform an updated interference search of all the sequences and issue a further action.

Applicant believes the application is in condition for allowance. A Notice of Allowance is earnestly solicited. Should the Examiner have any questions, she is requested to call Applicant's representative at the number shown below.

Respectfully submitted,  
*Wagner et al., Applicant*
